

INCIDENT MANAGEMENT SITUATION REPORT
TUESDAY, SEPTEMBER 8, 1998 - 0530 MDT
NATIONAL PREPAREDNESS LEVEL III

CURRENT SITUATION:

Initial attack and large fire activity continued in the Northern Rockies, Eastern Great Basin, Northwest and Southern Areas. The National Interagency Coordination Center processed orders for helicopters, aircraft, equipment, overhead, caterers, showers and radio systems. Very high to extreme indices were reported in Texas, Arizona, New Mexico, Utah, California, Oregon, Washington, Idaho, Wyoming, Colorado, Montana, South Dakota, Wisconsin, Michigan, and Nebraska.

NORTHERN ROCKIES LARGE FIRES:

BOYER, Montana State. A Type II Incident Management Team (Specht) is assigned. This fire is located about five miles northeast of Plains. Cooler temperatures allowed the inversion to lift assisting air operations. Crews nearly completed line construction around the fire yesterday and plans are for extensive mop-up in advance of the predicted frontal passage on 9/9. The acreage increase is due to burnout operations within the control line.

CHALLENGE, Flathead NF. A Type I Incident Management Team (Frye) is assigned. The fire is located about 40 miles east northeast of Kalispell. The fire continued to be active yesterday. It spotted to the northwest threatening structures on Sunday night. Crews constructed line and held critical areas on the northeast flank. The threat to US Highway 2, businesses and residences remains. A portion of the Blackfoot Traditional Cultural Site has burned and other parts are still at risk. Crews have been briefed on appropriate tactics to use when working within the Site.

DOME, Kootenai NF. A Type I Incident Management Team (Foster) is assigned. This wind driven fire is burning in steep, inaccessible terrain about six miles west of Libby. Fire growth yesterday was due to a burnout, which secured the line on the east flank. The threat to the town of Libby has lessened due to the successful burnout. Control problems continue to be limited access, low fuel moisture, unburned islands and inversions hampering air operations.

BITTERROOT COMPLEX, Bitterroot NF. A Type I Incident Management Team (Kohut) is assigned. The fire is located about six miles south of Darby. On the North Fork Rye, the fire continued to be active within the perimeter, with some spotting. Crews were committed to holding actions yesterday. The Coulter Fire is contained; however, there are still numerous active hot spots within the perimeter. Control problems include shifting winds, thunderstorms and steep terrain.

BOWL, Flathead NF. A Type II Incident Management Team (Swope) will assume control of the fire today. This fire is located in the Bob Marshall Wilderness Area. Smoke jumpers and crews successfully held fire lines yesterday. Predicted cooler weather and higher relative humidity should limit spread potential over the next few days. Control problems continue to be limited access and rugged terrain.

SPRUCE FIRE, Nez Perce NF. This fire is located in the Selway/Bitterroot Wilderness Area. It is being managed under a limited suppression strategy, with a primary objective of keeping it from crossing into Montana. There was no significant fire activity yesterday due to cloud cover and relatively high humidity levels.

GILBERT CREEK, Lolo NF. A Type II Incident Management Team (Gauger) is assigned. The fire is located 24 miles southeast of Missoula. Crews continued to construct line on the east and west flanks. They were pulled off the line yesterday afternoon because of high winds. Two spike camps were established to reduce travel. Fire activity was low yesterday. A thunderstorm went through the area yesterday afternoon, with high winds, hail and lightning. The Montana National Guard is assisting with incident support.

KOOTENAI COMPLEX, Glacier NP. A Fire Use Management Team (Adams) is assigned. This fire is being managed for resource benefit. The McDonald Creek Fire continued to burn slowly to the south yesterday, over Flattop Mountain. The Anaconda Fire has been inactive for the last three days.

BOULDER LAKE, Lolo NF. A Type II Incident Management Team (Cowin) is assigned. This fire is located about 25 miles northeast of Missoula. There was no significant fire activity yesterday. Moderate thunderstorms with gusty winds came through the fire area. Control concerns include steep, inaccessible terrain.

KOPSI CREEK, Kootenai NF. A Type II Incident Management Team (Sherwood) is assigned. The fire is located about 40 miles northwest of Kalispell. The fire was actively spotting up to a quarter mile yesterday. Most of the fire area is inaccessible to crews. Other control concerns include steep terrain, low humidity levels, and heavy fuel types with concentrations of snags.

BOB MARSHALL WILDERNESS COMPLEX, Flathead NF. This fire complex is located in the Bob Marshall Wilderness Area. It consists of ten fires and is being managed for resource benefit. No other information was received.

WEST FORK WILDERNESS FIRES, Bitterroot NF. A Type I Incident Management Team (Kohut) is assigned in addition to the Bitterroot Complex. There are 14 fires in the complex, which are being managed for resource benefit. Fire activity was low yesterday due to cloud cover and increased humidity levels. Structure protection plans remain in place at Paradise, Coopers Flat, Horse Heritage Cabins, and the Burnt Knob Lookout. Current threats are to historic structures, T & E aquatic species and an outfitter camp.

MOOSE COMPLEX, Nez Perce NF. An Interagency Fire Use Management Team (Johnson) is assigned. The complex consists of 11 Wildland Fire For Resource Benefit (WFURB) fires located in the Selway-Bitterroot Wilderness. This incident has been combined with the Powell Complex and both will be reported as the Moose Complex. The Gypsy and White Fires are being managed under a confinement suppression strategy with no resources currently assigned. Isolated thunderstorms went through the area yesterday, but rain was spotty and no significant amounts were recorded. All fires were fairly inactive due to lower temperatures, higher humidity levels and periodic cloud cover.

SOUTHERN AREA LARGE FIRES:

TURTLE HOLE, Texas State. This fire is located northeast of the community of Matador, Texas. The fire is burning in grass with an overstory of mesquite and cedar. Access to the incident is restricted due to steep terrain.

CEMENT, Texas State Forest Service. This fire is located in Young and Jack counties. Numerous structures are threatened, including four homes and three trailers. The fire is burning in grass with a mesquite overstory. Control problems include heavy fuel loading.

WARD, Texas State. This fire is located in Clay County. The fire is burning in grass with a heavy oak and mesquite overstory. No other information was received.

RUSTBURG, Virginia State. This fire is located in Campbell County, near the city of Lynchburg. It is burning in a pine plantation. No other information was received.

EASTERN GREAT BASIN LARGE FIRES:

POCATELLO VALLEY, Idaho Falls District, BLM. This fire is located about fifteen miles west of Malad City. A change in wind direction yesterday caused the fire to finger up into the mountains. Several out-buildings were burned. Control problems include high winds and steep inaccessible terrain.

MAIN SALMON COMPLEX, Salmon-Challis NF. An Interagency Fire Use Management Team (Zimmerman) is assigned. This complex is 40 miles west northwest of Salmon. The complex consists of 15 fires in the Frank Church River of No Return Wilderness on the Salmon-Challis, Payette, Nez Perce and Bitterroot National Forests. Observed fire behavior yesterday ranged from minimal to moderate, with some fires actively backing and others making short runs with some torching.

* Primary ordering office location.

NORTHWEST LARGE FIRES:

LOWE CREEK, Vale District, BLM. This lightning caused fire is located about 20 miles east of Baker city. It is burning in brush and thick grass. The fire was active yesterday until a rain shower slowed burning.

DALLES MOUNTAIN ROAD, Washington State. This fire is located about two miles east of Dallesport. No other information was received.

OUTLOOK:

Skies will be partly cloudy with scattered wet thunderstorms expected for the northern and central Rocky Mountains and the Great Basin. There will be increasing southwest winds over the higher terrain of the Pacific Northwest. High temperatures will range from 85 to 105 in the valleys and from the 70's to the 80's in the mountains.
